PROJECTS

Fibonacci Numbers - Mathematics

Jul 2020 - Jul 2022

In this project, we investigated the various properties of Fibonacci numbers and sequences similar to Fibonacci, their sum identities, relation with Golden Ratio, Pascal's Triangle and their Combintorial Interpretation. We also introduced conjectures related to the periodicity of Fibonacci numbers mod m and divisibility of Fibonacci numbers along with developing a JAVA Program to calculate the first zero and the period of Fibonacci sequence mod m. PUBLICATIONS

On the Existence of Balanced Generalized de Bruijn Sequences| Journal name: arxiv | Publication date: Jan 28, 2022

A balanced generalized de Bruijn sequence with parameters (n,l,k) is a cyclic sequence of n bits such that (a) the number of 0's equals the number of 1's, and (b) each substring of length I occurs at most k times. We determine necessary and sufficient conditions on n,l, and k for the existence of such a sequence.
